STATISTICAL FORECASTING

- Provide demographic services for school districts in the New York-New Jersey metropolitan area since 1998.

- Demographic consultant for the NYC Public Schools since 2006.

RICHARD S. GRIP ED.D.

- Executive Director
- Doctorate from Rutgers University Graduate School of Education in Educational Statistics and Measurement
- Numerous publications on school demography and presentations nationally
- Testified as an expert witness in school demography in several Administrative Law court hearings.

PURPOSE OF THE STUDY

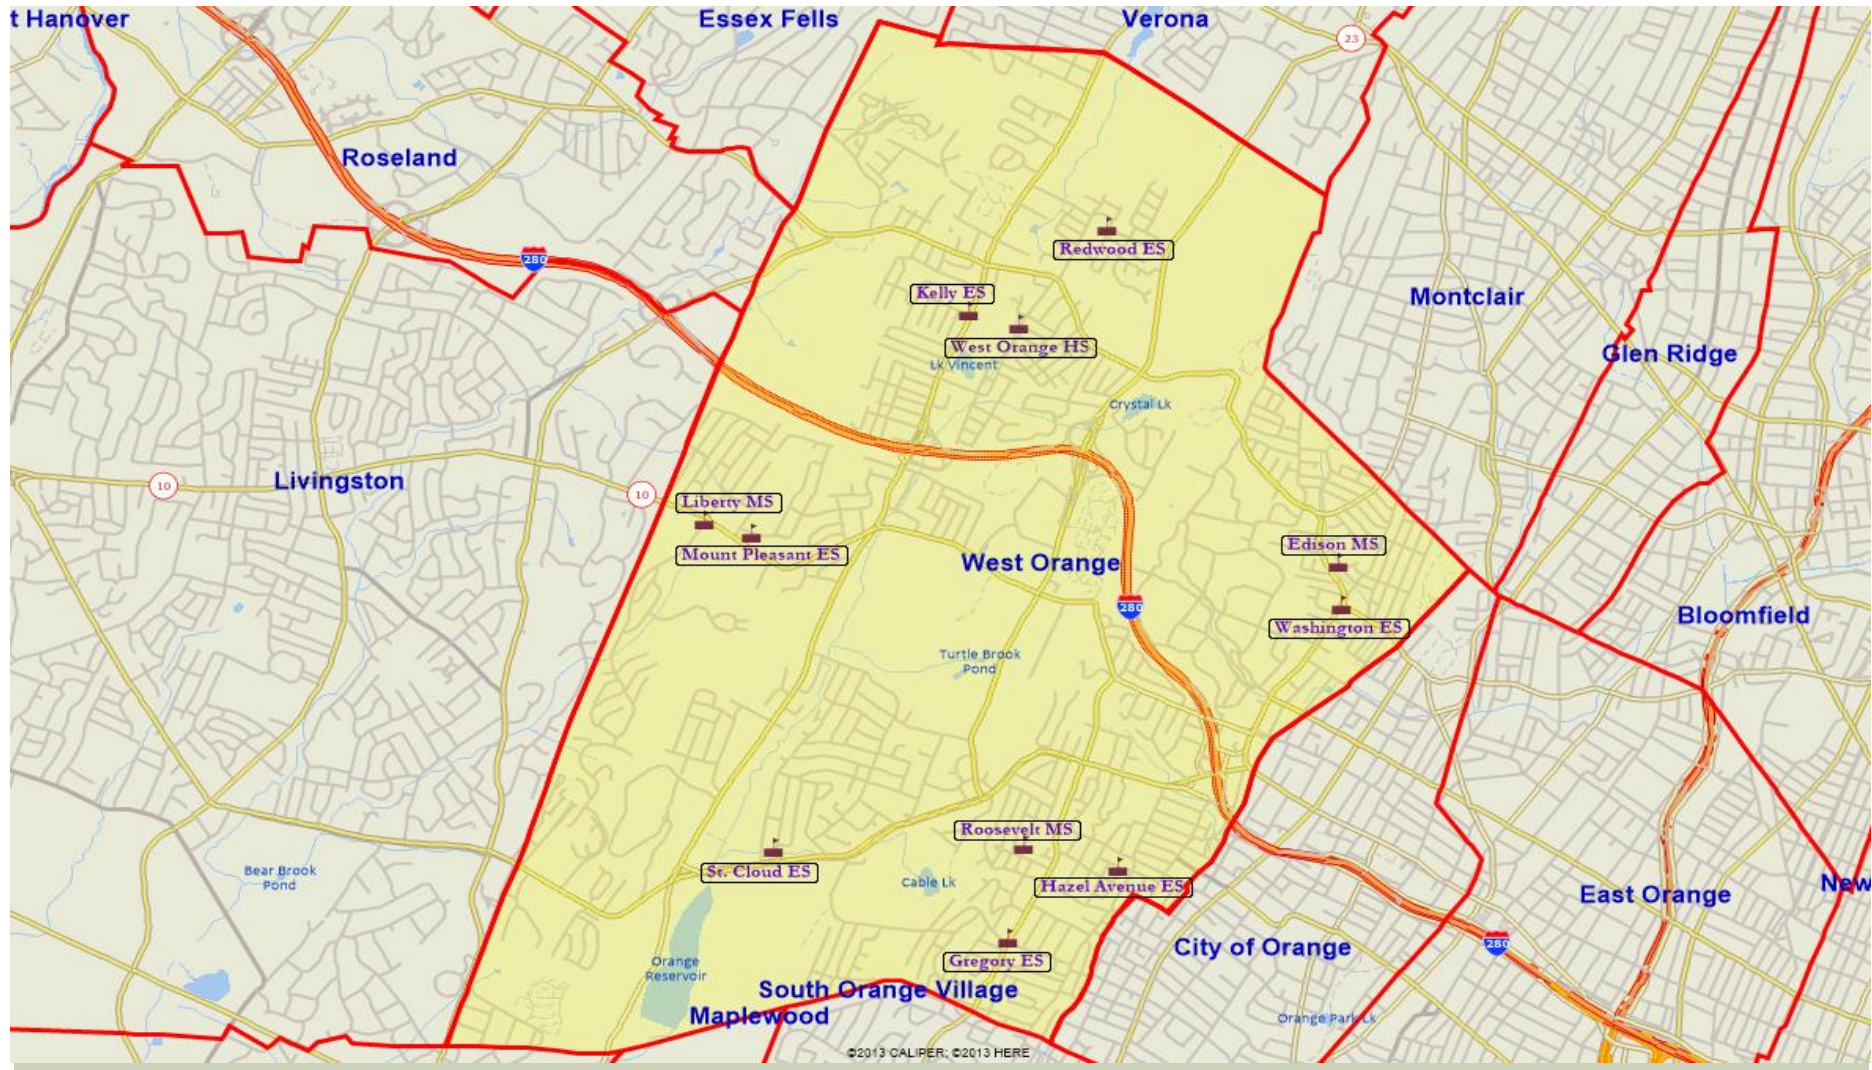

- ❑ Project grade-by-grade enrollments from 2017-18 through 2021-22
- ❑ Analyze district's historical enrollments, birth and fertility rates, community population trends, and age structure
- ❑ Impact of new developments on enrollment
- ❑ Compute student yields (children per housing unit) by property type

HISTORICAL ENROLLMENT TRENDS

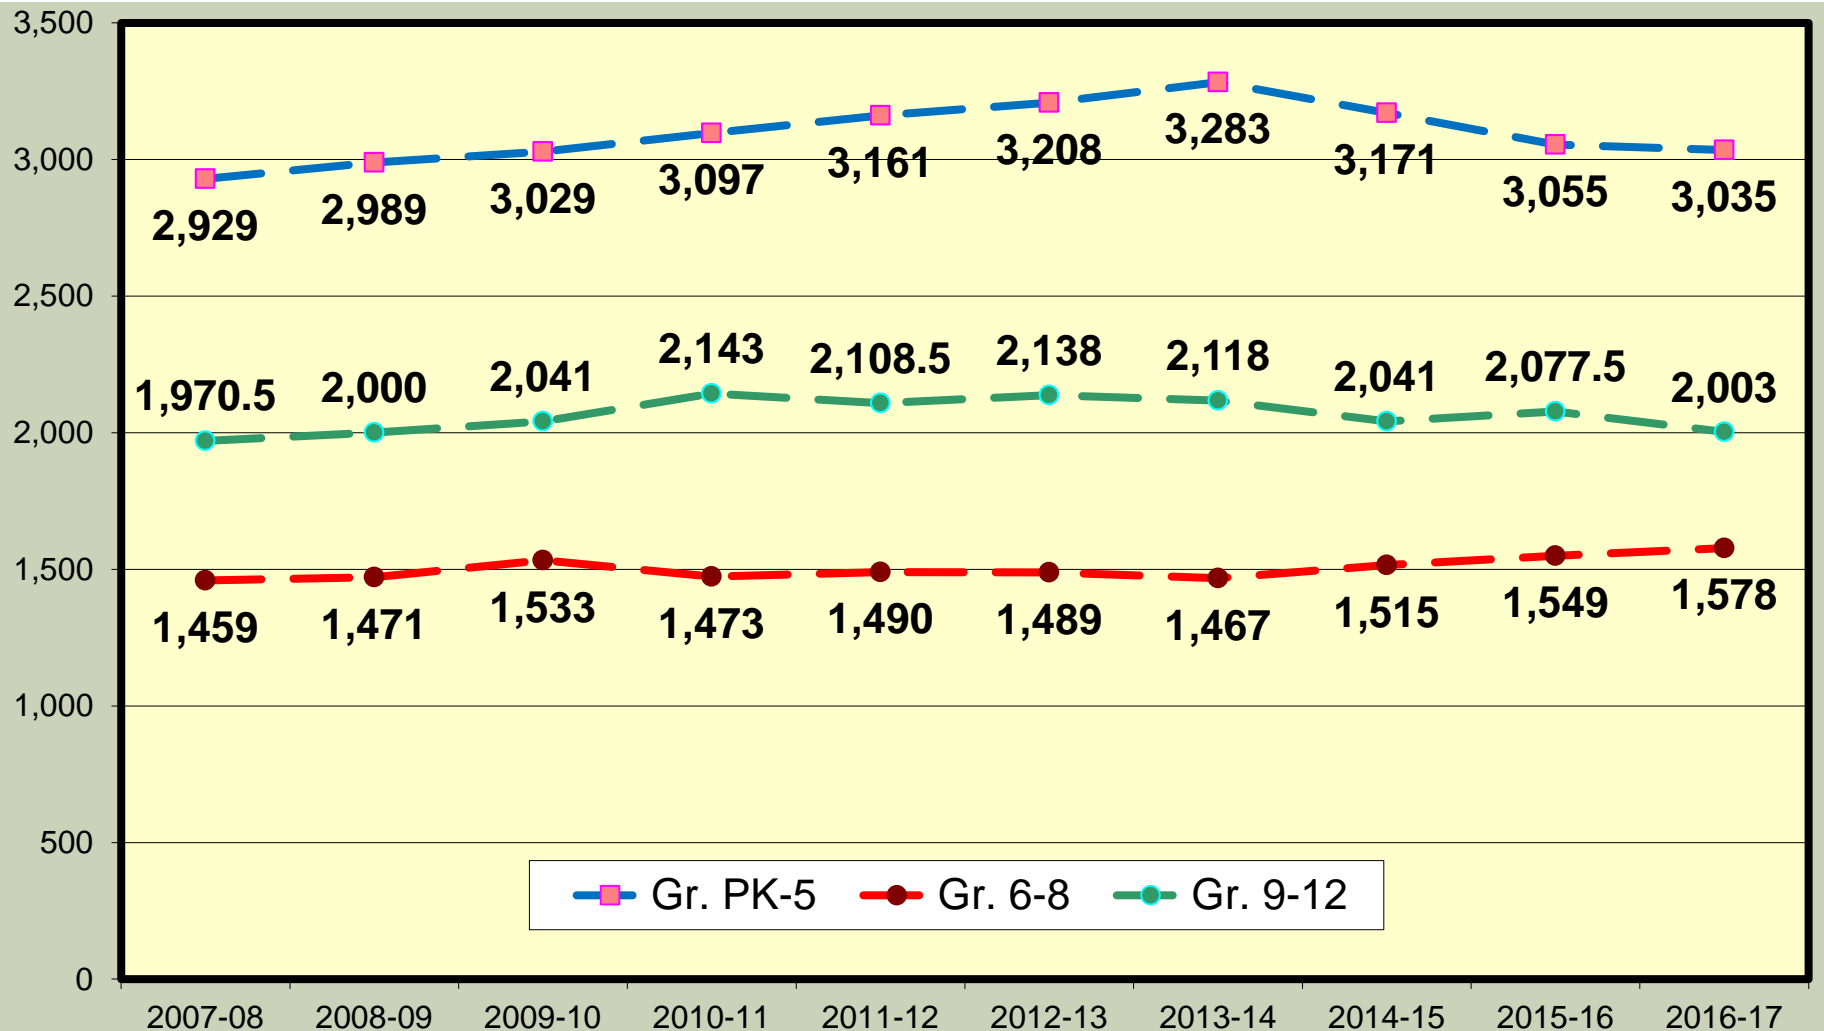

- ❑ District's 2016-17 enrollment is 6,616.
- ❑ District has lost 252 students in last 3 years after a period of increasing enrollment.
- ❑ Cohort-Survival Ratio Method (CSR) was used to project enrollments five years into the future.

HISTORICAL ENROLLMENTS BY LEVEL 2007-08 TO 2016-17

ENROLLMENT PROJECTION METHOD

COHORT SURVIVAL RATIO

- ❑ Ratios are calculated for each grade progression. (Ex. 100 1st graders in 2015-16 become 95 2nd graders in 2016-17 = 0.95)
- ❑ Survival ratios were computed for ten historical years.
- ❑ 9 of 13 average ratios were below 1.000 indicating net outward migration.
- ❑ Averages were then computed and used to project future enrollments.

KINDERGARTEN REPLACEMENT

- ❑ Positive kindergarten replacement (KR) has occurred in 8 of last 9 years. Magnitude has been declining over time.
- ❑ Positive KR- Number of graduating 12th grade students is less than the number of kindergarten students replacing them in the next year.
- ❑ Negative KR was 37 students in 2016-17, as 485 12th graders graduated in 2015-16 and were replaced by 448 kindergarten students in 2016-17.

BIRTH COUNTS

- ❑ Births are used to project kindergarten students 5 years later.
- ❑ Births have been declining– 696 births in 2003, 501 in 2014 (28% decline).
- ❑ Fertility rates in West Orange are lower than those in Essex County and New Jersey.

SUMMARY

- Enrollments are projected to be lower at the end of the 5-year projection period, particularly at elementary level.
- Declining birth rate has led to fewer children entering kindergarten.
- Multi-family homes have low student yields where new students is not enough to overcome West Orange's prevailing age structure and declining birth rate.
