Kelly Elementary School

02/19/2020

Due to concern of mouse infestation, West Orange Board of Education reached out to the West Orange Health Department for assistance and verification that action is being taken to rid mouse problem in school.

Met with Robert Csigi, Director of Buildings and Grounds at Kelly Elementary School to perform a walk-thru of school grounds to check for mouse activity. Several methodologies have been already made to rid problem such as having Alliance Pest Services come and work with the school to close/ repair areas that may have permitted rodent entry into building. Alliance came last 02/14/2020 to place 450 snap traps and monitoring traps throughout the school and are on call if any sighting or trap is set off by mice. Several tamper resistant bait boxes were also placed on exterior of building around foundation. Routine pest control is monthly. Mr. Csigi states, yesterday approximately 6 mice and babies were caught in traps and discarded immediately. ServPro was then called to take immediate action and entire school floors-classrooms, kitchen, food storage, nurses office etc. were cleaned and sanitized Tuesday night 02/18/2020. Additionally, furniture was moved in classrooms so ServPro could clean behind them.

During walk thru, several areas (classrooms, kitchen areas, storage rooms, library, art room, restrooms, basement level areas) were inspected for mouse activity and most rooms was found to be clean/sanitary. Classrooms #123, #108 and Art room did have a small amount of mouse droppings observed along floor wall borders and in drawers of Art room. Amount of droppings observed was very minimal and will be cleaned and sanitized today. Fan exhaust in Art room may be permitting rodents entry into building, so Mr. Csigi and Alliance Pest Services came up with a solution of retrofitting a box with mesh on the exterior of the building to prevent rodents from getting inside through the fan. This is planned on being corrected this week. All windows on ground level of school have been installed with metal mesh. All holes on interior of building have been previously repaired and sealed with steel wool and foam. All doors have been weatherstripped within the last 2 years.

Boiler Room and water meter room have a small amount of old rodent droppings and nesting material on the ground/ floor wall borders that need to get cleaned up and sanitized. Area is also scheduled to be cleaned this week.

Overall, walk thru inspection provided verification that school is found to be in a clean and sanitary state. Aggressive efforts have been made and a continued response to take action to rid mouse issue is evident.

SEE REVERSE SIDE FOR MATERIAL CODE LIST AND PRECAUTIONARY STATEMENTS

CONSUMER INFORMATION SHEET

The Delaware Department of Agriculture Pesticide Control Regulations require us to provide you with the information contained in this notice regarding pesticide use on the Subject Property. No application shall be made until the customer or resident has had an opportunity to review this information. The table below Advance Service Sheet lists the mandatory pesticide label instructions and precautions that could affect you for the pesticide(s) we will use on the proposed date of application. No application shall begin unless all pre-application instructions and precautions have been followed. If any of the information in the table below should change, we will issue to you a new Consumer Information Notice reflecting that change.

You are entitled by the Delaware Pesticide Law with the Department of Agriculture to request and receive from us the specific label for each pesticide that will be used on your property. Furthermore, if this is a contract for termite control (using pesticide other than termite baiting systems) we are required to give you a summarization of the regulations regarding proper application of termiticides (Delaware Pesticide Law's - 601 Delaware Pesticide Rules and Regulations, paragraph 22.3.2)

We are also required to provide the following phone numbers for your use in the event that you have any questions concerning the materials that we will be using:

National Pesticide Information Center (General Health & Pesticide Toxicology Information) (800) 858-7378
Delaware Poison Control Center - Statewide (Emergency Situations) (800) 722-7112
Delaware Department of Agriculture - Pesticide Control Program (302) 698-4571

Sanitation, as well as physical and biological measures, should be considered as part of a good pest control program. Pesticides may be used as another good pest control program. Pesticides are substances used to control living organisms and vary in degree of toxicity.

As a customer, I acknowledge that Alliance Commercial Pest Control, Inc. has provided me, in writing, all of the information that is required by the Delaware Pesticide Law's notification program. I have read the information supplied and understand my rights and responsibilities under this program. I have been told that I have the right to receive consumer information as outlined in the 40 Code of Federal Regulations, Part 170 of Workers Protection Standards. I decline to receive the information until such time as I withdraw this waiver by notifying the applicator or applicator business in writing.

Precaution Statements

- A) Do not allow people or pets to contact surfaces until spray is dried.
 B) Avoid contact with skin, eyes and clothing.
 C) Wash thoroughly with soap and water if come into contact with material.
 D) All exposed food/feed/drinking water products and packaging materials must be covered or removed prior to treatment.
 E) Remove all pets, birds, and other animals prior to treatment.
 F) Cover fish aquariums and unplug air filter, pumps, systems prior to treatment.
 G) Wash all food prep surfaces, areas, utensils and equipment after treatment.
 H) Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.
 I) People present or residing in the structure during application for termite must be advised to remove their pets and themselves from the structure if they see signs of leakage during an application for termites.
 J) In zoo's, remove animals and cover or remove animal food prior to application.
 K) In commercial establishments, after treatment, all food prep and contact surfaces, benches, shelving, utensils and equipment must be washed with an effective cleaning compound followed by a potable water rinse before resuming food operations.
 L) If there is a need to treat such areas as conduits, motor housings, junction boxes and switch boxes, or other electrical equipment, turn off electrical equipment prior to application. After the application has taken place, allow sufficient time for any oil to dissipate before starting equipment or placing the switches to the "ON" position.
 M) Wash udder and teats of dairy animals before milking.
 N) May be harmful if swallowed.
 O) Do not reenter treated areas for 3 hours after treatment is completed. After 3 hours, ventilate for 1 hour before reentering.
 P) Allow treated surfaces to dry and cover shelves with clean paper before replacing any utensils, food stuff or other items.
 Q) People and pets are not permitted to enter the treated area(s) for 1 hour after treatment has taken place to give dust time to settle.
 R) During overhead applications, cover and protect all surfaces below the areas being sprayed with plastic sheeting prior to treatment.
 S) Pet bedding should be removed and replaced with fresh bedding after treatment of pet areas.
 T) Cover or remove all food processing and handling equipment before treatments.
