Science Honor Society

The organization of the Science National Honor Society is one of volunteers who are teachers, scientists, and business people. These people are dedicated to creating a new cadre of scientific young people who will help to run tomorrow's high tech world.

Objectives

- Encourage and recognize scientific and intelligent thought
- Advance the students' knowledge of classical and modern science
- Communicate with the scientific community
- Aid the civic community with its comprehension of science
- Encourage students to participate in community service and in turn, encourage a dedication to the pursuit of scientific knowledge that encourages a dedication to the pursuit of scientific knowledge that benefits all humankind

MU ALPHA THETA

Mu Alpha Theta, the National High School and Two Year College Mathematics Honor Society, was conceived in 1954 by a committee of the National Council of Teachers of Mathematics under the chairmanship of Dr. Richard V. Andree of The University of Oklahoma. The committee recognized the need for a club to help overworked high school and Two-Year college mathematics teachers promote interest in the understanding of mathematics.

In October, 1956, a group of mathematicians under the leadership of Dr. and Mrs. Andree drew up a constitution for Mu Alpha Theta. The club began formally in the Spring of 1957.

The society is founded on four pillars: Scholarship, Leadership, Service, and Character, which are integrated into the tutoring services and academic competitions we participate in.
